GAMUT ASSURE

Grow with Expert AI Governance Agents.

Partner Network Overview | October 2026

The AI Assurance Officer is an expert AI governance agent. Build your practice around the agent and enterprise agent control, with human delivery responsibilities agreed upfront.

Referral Partner	Delivery Partner
Introduce organisations to Gamut. Gamut scopes the customer engagement and handles agreed technical onboarding.	Apply your professional expertise to assessments, evidence reviews and ongoing assurance alongside Gamut's AI governance agent. Accreditation and explicit client authorisation are required.
Referral status does not grant client workspace access, credentials or agent authority.	Client access is scoped, revocable and dependent on current standing, the workspace role and MFA.

Three customer offerings

Expert AI Governance Agent - Self-Managed: the customer directs the AI Assurance Officer agent and reviews its work.

Expert AI Governance Agent - Fully Managed: the AI Assurance Officer agent is supported by human expertise, engagement coordination and agreed output review. Gamut and partner responsibilities are scoped explicitly.

Agentic CISO - Enterprise: governance and zero trust control for the wider agent estate. Managed Agent Control is the managed delivery option.

Trust and responsibilities

The AI agent supports work across Discover, Assess, Classify, Govern, Evidence, Audit, Report and Improve. Its private identity and Gateway controls remain in place. Product access does not replace readiness, permissions or required human approvals.

Customers retain accountability. Partner status does not provide tenant administration, credential authority, independent approval powers or production runtime authority. Enabled Academy, sandbox and internal-use benefits are separate from client delivery.

Commercial clarity

Your agreement defines eligible referrals, fees, service scope and responsibilities. You retain revenue from your own separately agreed professional services. Existing signed agreements remain in force. Baseline Assessment is available as a one-off starting engagement.
